

Jon Josephs

UNITED STATES ENVIRONMENTAL PROTECTION AGENCY

REGION II
26 FEDERAL PLAZA
NEW YORK, NEW YORK 10278

OCT. 19 1987

CERTIFIED MAIL --
RETURN RECEIPT REQUESTED

Mr. Melford F. Tietze
ICI Americas Inc.
Law Dept., General Section
Wilmington, Delaware 19897

Re: 1) Bridgeport Rental and Oil Services Superfund site.
2) Your Freedom of Information Request No. (2) RIN-0829-87.

Dear Mr. Tietze:

In partial response to your September 16, 1987 letter to this agency, a copy of which you sent directly to me, attached is my most recent list of businesses and individuals to whom EPA has sent a request for information under Section 104 of CERCLA, the Comprehensive Environmental Response, Compensation and Liability Act as amended.

As I noted in my September 17 letter to you, only one entity has thus far received a notice letter informing it that it is a potentially responsible party under CERCLA. That entity is Allied Chemical Inc.

In addition, a court case was brought against the owners and operators of the facility, Messrs. Borelli and Bridgeport Rental and Oil Services Inc., under Section 7003 of the Resource Conservation and Recovery Act, in the days when CERCLA was relatively new and untried. (The consent decree which settled that case was sent to you previously.)

Enclosed are the logbook pages you had requested, reflecting information which was later coded into the printout you received with EPA's Request for Information.

The original copy of your September 16th letter, which was a Freedom of Information Act (FOIA) request addressed to this agency's FOIA officer, has not found its way to this office, and

227101

I have not been able to locate it. Consequently, I am uncertain whether someone else will be providing a further EPA response to your FOIA request.

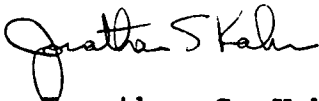

In the absence of any other response from the agency, my response is as follows: Based upon my familiarity with the files in this matter, there are several thousand pages of documents responsive to the second category of your request.¹ Accordingly, in conformity with the EPA regulation found at 40 Code of Federal Regulations §2.120(c), assurance of prepayment must be forthcoming before duplication of these records can begin.

However, we are definitely willing to provide in the meantime, and indeed, have provided, more specific documents in response to a more specific, tailored request.

While we have not provided all of the information sought by your letter, I believe I have provided the several specific items we had discussed by telephone.

In addition, as we discussed, a file consisting of public documents such as the consent order and the Record of Decision (both of which you already have) as well as the Remedial Investigation and the Feasibility Study for this site has been assembled and is available for review. If it is acceptable for you to consult this file in our offices, please let me know when you would like to do so, and we will try to set up a mutually convenient time.

Sincerely,

Jonathan S. Kahn
Attorney
Office of Regional Counsel

Enclosure

1. You requested

"2. Copies of reports relating to (a) investigations of wastes and/or releases of hazardous substances at the site, (b) the existence of actual or potential environmental pollution related to release of hazardous substance at the site; and (c) the study, or proposal of remedial actions; including but without being limited thereto any hazard ranking study, remedial investigation reports, feasibility studies, Record of Decision and any addenda or supplements thereto."

10/16/87

Recipients of information request letters concerning the Bridgeport Rental and Oil Services site in Logan Township, New Jersey are listed below. The earliest of these information requests was sent out in 1982. This list is up to date as of 10/16/87 and is complete to the best of our knowledge. .
